SUMMARY

- Ambitious bilingual **Full Stack Web Developer** with a passion for creating clean code and user-friendly applications.
- Versatile **team player** with proven success in customer service and cross-team collaboration.
- Proficient in the **MERN Stack**; flexible, fast learner bringing curiosity and passion to every project.

TECHNICAL SKILLS

Languages: HTML, CSS, Javascript, Node.js, Express.js, MySQL, React.js, NoSQL, MongoDB, GraphQL, Handelbars.js,
Frameworks: Jest, Bootstrap, APIs, Sequelize, Mongoose, Progresive Web Apps
Applications: VS Code, Insomnia, Heroku, Cloud MongoDB, Netbeans

PROJECTS

Player Up│ **https://github.com/rramosx11/player-up** │
https://playerup2022.herokuapp.com/

- *Player UP is a social application where a user, when logged in, can browse local activities that are available to sign up to participate in, sign up for activities, and add an event for others to join. This is a MERN stack application composed of a REACT front end, MongoDB database, and Node.js/Express.js server with a GraphQL API built with Apollo Server.*
- *Responsibilities included working on the backend of the project creating/testing the mutations and queries in GraphQL. Worked on the front end with the single-events page using React. Also converted the react app into a Progressive Web App (PWA).*

Pawfect Friends │ **https://github.com/rramosx11/Pawfect-Friends** │
https://pawfect-friends-app.herokuapp.com/

- *A secure social media app for pets that allows users to create a pet profile, post text or images, and make comments on all content.*
- *Responsibilities included working on the backend of the project creating the CRUD routes for the social media posts. Worked in the public javascript folder to edit and delete posts in the dashboard and in User's profile. Worked on the handlebars.js templates (dashboard, edit-post, single-post) to make sure that posts were displaying on the deployed server.*
- *HTML/Handlebars, CSS/Bulma, JavaScript, Node.js, Express.js, MySQL, Sequelize*

Event Finder │ **https://github.com/rramosx11/wheres-the-band** │
https://rramosx11.github.io/wheres-the-band/

- *Application that uses two server-side APIs (Google Maps Directions and Seatgeek) to get directions from the starting address to the selected event location.*
- *Responsibilities included to save the recent searches from the API calls to the local storage as an Array and appending it on the left side of the application as an href link as a "recent searches" section.*
- *HTML, Tailwind CSS, APIs (Google Map Directions, SeatGeek), Javascript, Jquery*

EXPERIENCE

IMS Specialist (Payment Specialist)   May 2019 – Current
Syneos Health, LLC   Morrisville, NC
Process the monthly and quarterly payments of auto generated visits and vendor invoices to PI sites in NA, LATAM, and ROW for 20 clinical trials at a time. Analyze and interpret the payment terms and conditions of fully executed site clinical trial agreement (CTA). Serve as subject matter expert for department and project teams concerning contract interpretation and development of payment strategy. Create and review financial reports for clinical trials studies.
- Key Accomplishments:
  - *Trained the team on the ad-hoc uploader process. This process allows the specialist to manually enter up to 1000 lines of costs into our CTMS system via an excel sheet.*
  - *Handled the payments for the Otsuka portfolio containing 10 studies with 50 sites for NA and LATAM. Processed more than 2 million USD per month.*

EDUCATION

Boot Camp Certificate: *UNC Chapel Hill, Chapel Hill, NC*
A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap,, Node.js, MySQL, MongoDB, Express, Handelbars.js, and ReactJS.

Bachelor's Degree : *Catawba College, Salisbury, NC*
4 year degree with a major in Business Administration, a concentration in Accounting, and a minor in Information System.
